

**Installation
Instructions for
Slide Pendant Field
Instruction**

1. Remove the existing swing pendant (#3201), screw (#3569), and nut (#416).
2. Discard the swing pendant. Save the screw (#3569) and nut (#416), they will be re-used to mount the slide pendant (#4738 for RH) or (#4830 for LH).

MASON™

**Installation
Instructions for
Slide Pendant Field
Instruction**

- Using the screw (#3569) and nut (#416) removed in step 1, bolt the slide pendant (#4738 for RH) or (#4830 for LH) to the latch catch. The screw (#3569) should not be fully tightened. Leave enough clearance so that the slide pendant (#4738 for RH) or (#4830 for LH) can move freely up and down.
- Install a new ¼-20 x 5/8" screw (#375) with a new ¼-20 locknut (#421) in the slot as shown and through the hole in the latch catch. Leave enough clearance when tightening, as you did in step 3
