Containment Coordination, Delivery + Installation

Expert guidance from start to finish.

Midmark offers a comprehensive range of containment solutions that cater to a variety of facility needs. However, installing a series of kennel runs in your facility can be challenging. Let our team assist you by coordinating early in the design process and providing site visits, field measurements and oversight to ensure proper installation that results in a safe, comfortable space for the animals in your care.

MIDMARK CONTAINMENT INSTALLATION

- Midmark Field Project Manager is assigned and on-site for the duration of delivery and installation.
- Site survey is performed and field measurements are confirmed to ensure proper installation.
- Installation professionals mount kennels and transfer doors to facility floors, walls or surfaces according to best-practice.
- Applicable containment systems are set up and configured according to proper protocols.
- Midmark-trained team installs product per the statement of work.
- Customer walk-through and punchlist resolution is completed.

01 Kennels units are properly sealed to protect the longevity and safety of kennel materials.

02 Appropriate hardware is installed to provide a secure fit and proper functionality.
